Permata Buah Batu blok i 26b

Fresh graduate in Information Technology with a strong interest in system development and digital technologies. Experienced in academic and internship projects related to application development, system implementation, and technology solutions, with a solid understanding of programming fundamentals. Highly motivated to learn, adapt, and contribute while continuously developing technical and professional skills.

Pengalaman Kerja

PT Karya Multi Solution Indonesia

Jun 2025 - Aug 2025

IT Development Staff

- Developed a web-based project as part of the KMSI program
- Built and implemented a smart system prototype as an academic project
- Implemented real-time data monitoring features in a web application
- Applied programming fundamentals in web-based project development

MQFM BANDUNG

Sep 2026 - Jan 2026

Project Manager

- Coordinated collaboration between development app teams
- Led the development of a mobile application for Islamic dakwah
- Supported testing, evaluation, and improvement of application features
- Defined project scope and user flow based on content and user needs

AIO VILLA

Jul 2026 - Aug 2026

Frontend

- Developed a responsive and user-friendly web interface for a villa and accommodation reservation platform in Lombok.
- Integrated frontend components with backend RESTful APIs to deliver a seamless room browsing and real-time booking workflow.
- Collaborated closely with team members to ensure design consistency, cross-browser compatibility, and optimal load performance.

Jenjang Pendidikan

Universitas Telkom

Aug 2022 - Jul 2026

Bachelor of Bachelor of Information Technology graduate from Telkom University with experience in web, mobile, and Internet of Things (IoT) development. Strong foundation in programming and application development with hands-on experience through academic and project-based activities. Actively involved in student organizations with experience in teamwork, communication, and leadership.

Pengalaman organisasi

Al-Fath - Telkom University

Feb 2025 - Jan 2026

Head of Business Development

- Formulated and executed fundraising strategies to secure independent revenue streams for the organization.
- Collaborated with on-campus student entrepreneurs to expand mutual business opportunities and funding
- Supervised and mentored the business development division, orchestrating project planning.

IoT Laboratory - Telkom University

Jul 2025 - Jan 2026

Laboratory Assistant

- Mentored students in troubleshooting hardware modules, and sensor integrations during lab experiments.
- Assisted in developing and preparing IoT-based laboratory modules and technical documentation.
- Evaluated student assignments, practical exams, and project submissions to ensure adherence to academic and technical standards.

Keterampilan, Prestasi & pengalaman lain

- Achievements** 🏆 (2026): Authored and published a research paper titled "Implementation of Quantization and Pruning Long Short-Term Memory (LSTM) Model for Efficient IoT-Based Smoke Detection". The research focused on designing and optimizing a lightweight deep learning architecture suitable for resource-constrained IoT edge devices. By implementing weight pruning and post-training quantization techniques, the model achieved significant reductions in memory footprint and inference latency while maintaining robust real-time smoke detection accuracy.
